

'An Overview of Land Rover Discovery III and Range Rover Sport'

This course provides an overview of vehicle systems operations and component location. It describes how to effectively diagnose faults using the *Autologic* and looks at common faults that occur with each vehicle system. The course also demonstrates how to change vehicle configuration using the *Autologic* tool and shows the greater flexibility *Autologic* provides compared to the dealer tool. It will also explain how to diagnose air suspension faults, calibrate the suspension and use other air suspension functions that are unique to *Autologic*. Finally the course will also explain how to program modules using the *Autologic*.

Key topics covered:

- Body, chassis and engine system operation
- Component location
- Fault code diagnostics
- How to change vehicle configuration
- Air suspension diagnostics and height calibration
- Module programming

Date: 28th February 2012
REPEATED 1st March 2012

Time: 09.30 - 17.00
